CSUN's Design & Innovation Program

You're a designer with a diverse portfolio. You've built a solid professional network. Your work blends stunning visuals with immersive, accessible technology. But still...something feels missing.

Design and technology trends are ever-evolving. From sustainable design and adaptive UX technology to more efficient architecture and interior design solutions, even accessible virtual reality, modern innovations are reshaping how we create and connect.

Have you thought about pursuing a graduate degree or certificate in design? If you've brushed off the idea before, it might be time to take another look. Join **CSUN's Design and Innovation program** to drive innovation in your career. We're here to help you push the boundaries of your creativity.

Our program offers more than just advanced skills—it's an opportunity to challenge your design philosophies and grow in ways you never imagined. CSUN graduates are leading the charge by blending cutting-edge ideas with initiatives that champion diversity, sustainability, and inclusion. Plus, you'll join a community of like-minded designers and creators, expanding your professional network and support system.

Take your expertise to the next level with a degree or certificate in Design and Innovation from CSUN. Our online design and innovation courses are tailored for professionals in marketing, design, and business. And with the flexibility to learn on your schedule, there's no better time to invest in your future.

CSUN

Innovation– Driven Career Growth

The fully online **Master's in Design and Innovation program** at CSUN is comprised of three certificates that can be earned independently or "stacked" to create a personalized degree plan. Each certificate focuses on three key areas in the field to help students meet their professional and educational goals.

Certificates can be earned in:

- Design for Strategy & Systems
- Design for Experiences & Interactions, and
- Design for Leadership & Impact.

When coursework is completed, you'll join a student cohort to complete a graduate project. These projects offer practical experience and the opportunity to collaborate with top industry professionals. You'll graduate ready to step into the design career you've always envisioned—with real-world expertise to back you up.

CSUN

Earn an Advanced Design and Innovation Education

You've built a career you're proud of. Now is the time to master advanced skills in creative problem-solving and strategic leadership. Are you ready to amplify everything you've learned and earned and take it to the next level? With a degree or certificate in **Design and Innovation** from CSUN, your next step is only a click away.
